

Reference number: _____

Veterinary Health Certificate
for export birds (other than land fowls and waterfowls) more than 3
days of age to Taiwan
(Applicable to 6 or more birds, including pigeons, parrots, eagles and
other birds of flight etc.)

Part I: Details of dispatched consignment

1.1 Exporter: _____

Address: _____

1.2 Importer: _____

Address: _____

1.3 Country of export: _____

Place of origin (province, district and so on): _____

Animal enclosure: _____

Address: _____

1.4 Description of Animals:

Total quantity: _____

Identification number (leg ring or other identification marks)	Scientific name	Identification number (leg ring or other identification marks)	Scientific name

1.5 Place of dispatch: _____

Exporting border post: _____

Means of transport: Aeroplane Ship

Part II: Animal Health Information

2.1 _____ (the exporting country or zone) is free from highly pathogenic avian

influenza.

2.2 The animals have been kept, for three months prior to export or since hatching, in an enclosure regularly inspected by veterinarians who are also responsible for disease diagnosis and notification.

2.3 The disease listed below have not been confirmed in the animal enclosure for the below time periods:

2.3.1 for one year without Newcastle disease, pullorum disease, fowl cholera or avian tuberculosis; and

2.3.2 for six months without H5 and H7 subtype avian influenza, avian chlamydiosis, avian mycoplasmosis caused by *Mycoplasma gallisepticum* or infectious coryza.

2.4 The animals have been detained for pre-export quarantine in a facility designated and supervised by the exporting country’s animal quarantine authority for at least 21 days prior to shipment.

Date of quarantine period: from _____ to _____

2.5 During the pre-export quarantine, the animals are considered healthy and free from any disease symptom during quarantine by animal quarantine inspectors.

2.6 During the pre-export quarantine, the animals have been subject to the following tests—all test results are negative – by the exporting country’s government laboratory or designated laboratory in compliance with the “Manual of Diagnostic Tests and Vaccines for Terrestrial Animals” of the World Organization for Animal Health (OIE). Twenty birds are sampled in each consignment. For a consignment of 20 or less than 20 birds, every bird are sampled.

2.6.1 for H5 and H7 subtype avian influenza: antibody test or causal agent identification;

2.6.2 for Newcastle disease: causal agent identification.

Test	Date of test sample collection	Name of the test laboratory	Method of the test	Date of test conducted	Result of test
Test of 2.6.1 <input type="checkbox"/> antibody test; or <input type="checkbox"/> causal agent identification					
Test of 2.6.2					

2.7 During the pre-export quarantine, all birds in the Family Psittacidae are administered with following medication to treat or prevent avian chlamydiosis.

chlortetracycline; or

doxycycline; or

medication deemed, by the exporting country’s animal quarantine authority, of equivalent efficacy in treating or preventing avian chlamydiosis

2.8 West Nile fever

The exporting country has been without any incident of West Nile fever for at least one year; or

The pre-export quarantine in point 2.4 of this certificate is conducted in a mosquito proof facility

Reference number: _____

designated and supervised by the exporting country's animal quarantine authority.
